PRAGUE

Prague, the capital city of the Czech Republic is poetically considered to be the heart of the European continent. Its history is deeply rooted in every building and one can feel the cultural spirit in every step. Different architectural styles have been preserved throughout the wars and years of the communist era, allowing visitors to compose their own image of Prague. With the Prague Castle, the largest castle complex in the world on one side, and the Dancing House representing contemporary architectural tendencies on the other, visitors can appreciate the centuries of history embedded in the buildings. Prague is not only a city of historical monuments, but also a city for living, where culture is an integral part of life. It has been a source of inspiration for famous Prague residents and personalities, such as Einstein, Kafka, Mozart, and Beethoven.

Since the Velvet Revolution, Prague, the meeting point of Eastern and Western Europe, has quickly become a site to host multiple scientific conferences and cultural events.
